

## Apr – Jun 2006: An Update from BISIL NA, Inc

Bala Cynwyd, PA, Jun 30, 2006 (BISIL, NA) – Q2-06 was another stellar quarter for Enj in the marketplace with acquisition of marquee clients. Enj deployments included deployments at a Global 500 diversified corporation with businesses in energy and petrochemicals. The GL component of Enj has gained relevance with expansion of processes. These deployments are a good example of how Enj supports 'delivery to value' concept.

### About Enj

Enj is a leading Business Process Management (BPM) product from BISIL that enables organizations automate and manage business processes.

BISIL's Enj is a versatile Enterprise Business Process Management Platform that enables organizations to attain a higher level of agility and efficiency by helping automate processes as well as providing a system to govern and monitor the efficiency of the processes employed. Enj incorporates a full business process life-cycle connecting "people with people", "systems with people" and "systems with systems". It combines capabilities of Work Flow, Transaction Management, and Document Management in one system that is web-based, user friendly, scalable, and has a service oriented architecture (SOA).

### Enj in Professional Services

Enj has an existing track record in the professional services segment. Enj deployments in professional services gained further depth with additional deployments for automating processes such as in the production, management, and distribution of marketing collateral. This helps support both the Quality Procedure initiative, as well as helps comply with SOX guidelines. The solution helps manage business rules based on the document level attributes as well as process flow characteristics.

### Enj in Public Sector

Enj expanded on its deployments in the public sector as well. Most notably, Enj helped automate processes at the state level for capturing key elements for all contracts signed by any state agency, running them through a QC process, integrating this with the imaging database and finally extending this to the public at large through a web portal. This specific solution has many components to it and helps integrate the operational processes with the existing repository of contracts. The added benefits of the solution offered were dynamic search capability on the portal, and reports to track the usage of this portal. These were enabled using the Portal and Dashboard components of Enj respectively.

### Enj GL in Petrochemical Industry

Enj was used for a prestigious assignment this quarter, with its GL module implemented for a global leader in petrochemical industry. Apart from standard GL modules including roll-up groups, authorizations rules and levels, appropriation, online posting, customer, supplier ledgers, drill-down schedules in final accounts; advanced modules for subsidiary/ branch accounting, consolidation and job costing have also been implemented.

The other add on processes related to modules like Inventory and Payroll are also a part of the solution deployed.

### Enj in Financial Sector

The other market segment in which Enj experienced growth is the Financial Services Sector. An example of a deployment during this quarter is Enj's use by investment banking research firm that uses Enj to extend its data gathering, collection, collation process to its PEG clients. The solution comprises of processes for collecting transaction information from private equity groups on an anonymous, delivering it in an encrypted format and large enough batches to protect the identification of individual firms or deals and generating periodic reports on this data.

### Enj Features and Functionality

Enj has added many new features and enhanced the existing features in its various modules making the delivered solutions feature-rich and friendly. The prominent among them are tighter security management features – both for internal users as well as those registering on the web portal; advanced UI features in Modeler and Designer; enhancements to menu structure personalization; parameterized control of settings.

### Enj Distribution Network

Enj has found many satisfied users in the market and BISIL is pleased to be extending its distribution network with the resellers that bring wider geographical and technological coverage to BISIL's distribution network. BISIL has added partners in Middle East, Near East and South Asia.

### Future Guidance

- Optimization to the wireless features – Enj Mobile
- Integration to transact through reports
- AJAX technology integration
- Enhancements to the rules engine
- Point Solution – SOX – Consolidation modules
