Enj Ver 10.2

Bala Cynwyd, PA, May 2013 – Over the last few years many new features have been added to Enj which has made it feature-rich and one of the best BPM products. Enj also found itself being used in many domains, one of the biggest being Healthcare. While continuing with adding new features the focus has been shifting to making the product robust and efficient.

About Enj

Enj is a leading Business Process Management (BPM) product from BISIL that enables organizations to automate and manage business processes.

BISIL's Enj is a comprehensive Enterprise Business Process Management Platform that enables organizations to attain a higher level of agility and efficiency by helping automate processes as well as providing a system to govern and monitor the efficiency of the processes employed. Enj incorporates a full business process life cycle connecting "people with people", "systems with people" and "systems with systems". It combines capabilities of Work Flow, Transaction Management, and Document Management in one system that is browser-based, user friendly, scalable, and has a service oriented architecture (SOA).

Reports

Enhancement

- Added formula in group reports for header/footer.

Fixes

- Fixes for report opening in full view in IE 9.
- Submit button placement in a parameter form in a report shows correctly at runtime.
- PDF or Excel format of a report can be downloaded from the report.
- Font size in reports can be adjusted or changed as desired and reflects the same at report runtime.
- Removed precision point for formula field marked as Integer
- Added static list values to be handled in the formula.
- Formula fixes for Header and Footer in group report
- Fixes for showing previous search results when there is an error.

Portal

Enhancement

- Added tooltips in portal to help the user.
- User Interface for Layout Settings introduced to configure portals
- Portal designer restricted to Admin users only.
- Added a new widget parameter setting - disable widget height input field if auto height is selected and vise versa
- Increased widget size from 6 to 10, now maximum 10 widget can be added in each column
- A column padding included in portal properties.
- A user may have access to multiple portals. Navigation between multiple portals is feasible.

Fixes

- Welcome message padding issue fixed.
- Manually give values to various spinners like Widget padding, border etc, while designing the layout of portals.
