

Enj Ver 10.2

Bala Cynwyd, PA, June 2013 – Over the last few years many new features have been added to Enj which has made it feature-rich and one of the best BPM products. Enj also found itself being used in many domains, one of the biggest being Healthcare. While continuing with adding new features the focus has been shifting to making the product robust and efficient.

About Enj

Enj is a leading Business Process Management (BPM) product from BISIL that enables organizations to automate and manage business processes.

BISIL's Enj is a comprehensive Enterprise Business Process Management Platform that enables organizations to attain a higher level of agility and efficiency by helping automate processes as well as providing a system to govern and monitor the efficiency of the processes employed. Enj incorporates a full business process life cycle connecting "people with people", "systems with people" and "systems with systems". It combines capabilities of Work Flow, Transaction Management, and Document Management in one system that is browser-based, user friendly, scalable, and has a service oriented architecture (SOA).

Transact Fixes

- If the upload file is too large then split the file and upload.

Portal Enhancement

- New menu option 'My Portals' allows the portal navigation better. This lists all portals that are assigned to the logged in users roles.
- Changes for Tab designer to show list of portals belonging to current portals role
- While navigating from one portal to another, the parameter values can be passed with this new feature.
